INNOVATION & TECHNOLOGY SUMMIT

T H E M E

AI, Digital Economy & Sustainability

November 25, 2025
Shehu Musa Yar'Adua Centre,
Abuja, Nigeria

•Participate • Collaborate • Innovate

Why InnTech?

The convergence of Artificial Intelligence (AI) and the Digital Economy is transforming industries, governance, and livelihoods across the globe. For Africa, these technologies present a once-in-a-generation opportunity to leapfrog traditional development barriers and accelerate progress. Yet, they also raise critical questions around environmental sustainability, ethics, inclusion, and long-term resilience.

As the world advances toward the United Nations Sustainable Development Goals (SDGs) 2030, aligning digital transformation with sustainability imperatives has become an urgent priority. For Nigeria and Africa, this is a pivotal moment—where policy, innovation, and responsible technology deployment must intersect to ensure inclusive, green, and future-ready growth.

InnTech Summit 2025 is a high-level, multi-stakeholder platform that will foster dialogue, showcase innovation, and inspire collaborative action towards a digitally-enabled and environmentally-conscious Africa.

Summit Format

- Keynote Addresses from global and local thought leaders
- Panel Discussions with policymakers and industry leaders
- Fireside Chats with digital economy champions
- Innovation Exhibitions showcasing startups, solutions, and green technologies

Objectives

- Explore the intersection of AI, digital transformation, and sustainability in the African context.
- Showcase emerging innovations and practical use cases that drive economic growth and environmental resilience.
- Engage policymakers, industry leaders, academia, and young professionals in strategic dialogue.
- Co-create policy frameworks and recommendations for ethical AI, green technology adoption, and sustainable digital economies.
- Strengthen cross-sector partnerships that accelerate Africa's digital and sustainability agenda.

Key Topics

1. Artificial Intelligence for Development
2. Data Privacy, Ethics & Governance
3. Digital Trade & Africa's Economy
4. Green Tech & Climate Innovation
5. Startups, Investment & Innovation Ecosystems
6. Policy, Regulation & Global Partnerships

Expected Outcomes

- A Communiqué outlining policy recommendations for responsible AI and sustainable digital transformation.
- Launch of “Green Digital Africa” – a cross-sectoral working group/initiative.
- Exhibition of innovations and digital solutions advancing SDGs.
- Networking and partnership opportunities across government, private sector, and development organizations.

Target Audience

- Government and regulatory agencies
- Development partners
- Technology and sustainability experts
- Digital economy startups and innovators
- Academia and research institutions
- Young professionals and digital talent
- Media and civil society organizations
